Databases: MySQL, SQLite
Tools: Git, GitHub, VS Code, Postman
Concepts: Object Oriented Programming, Data Structures, Algorithms, DBMS

PROJECTS
Campus Placement Portal | Python, Flask, MySQL
- Built a Flask web application with 12 REST API endpoints for student and recruiter registration, login and job posting.
- Designed a normalized MySQL schema with 6 tables and indexed the job_id column, which reduced the placement search query time from 2.1s to 0.3s.
- Implemented role-based access control using sessions and decorators.

Library Management System | Java, MySQL
- Developed a console application in Java using OOP concepts such as inheritance, encapsulation and polymorphism across 14 classes.
- Wrote JDBC code to persist books and issue records to a MySQL database.
- Handled exceptions and input validation to prevent corrupted records.

Weather Dashboard | Python, REST API
- Consumed a public weather REST API and rendered results in an HTML dashboard.
- Cached responses in SQLite to cut repeat API calls by about 70%.

CERTIFICATIONS
- Python for Everybody (Coursera)
- SQL Basics (HackerRank)

ACHIEVEMENTS
- Solved 300+ problems on LeetCode and HackerRank in Python and Java.
- Technical lead of the college coding club; organised 2 hackathons for 150 students.

STRENGTHS
Strong problem solving, clear written and verbal communication, quick learner, comfortable working in a team and participating in peer code reviews.
